You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

Data Collection

What data will you collect or create?

Environmental data will be collected from various sources including air quality monitoring stations, water quality monitoring stations, and soil sampling. The data will include concentrations of PM_{2.5}, PM₁₀, VOCs, and NH₃. The data will be collected on a regular basis and will be used to assess the impact of the project on the environment. The data will be stored in a secure database and will be accessible to the project team. The data will be used to develop a GIS map of the project area and to assess the impact of the project on the environment.

How will the data be collected or created?

The data will be collected using a variety of methods including air quality monitoring stations, water quality monitoring stations, and soil sampling. The data will be collected on a regular basis and will be used to assess the impact of the project on the environment. The data will be stored in a secure database and will be accessible to the project team. The data will be used to develop a GIS map of the project area and to assess the impact of the project on the environment.

Documentation and Metadata

What documentation and metadata will accompany the data?

The data will be accompanied by documentation and metadata including a data dictionary, a data management plan, and a metadata schema. The data will be stored in a secure database and will be accessible to the project team. The data will be used to develop a GIS map of the project area and to assess the impact of the project on the environment.

Ethics and Legal Compliance

How will you manage any ethical issues?

The project team will manage any ethical issues by following the principles of the Declaration of Helsinki and the Belmont Report. The project team will ensure that the data is collected and used in a way that is consistent with the principles of ethics and legal compliance.

How will you manage copyright and Intellectual Property Rights (IPR) issues?

Storage and Backup

[illegible][illegible]

Selection and Preservation

Which data are of long-term value and should be retained, shared, and/or preserved?

[illegible]

What is the long-term preservation plan for the dataset?

[illegible]

Data Sharing

How will you share the data?

[illegible]

Are any restrictions on data sharing required?

[illegible]

Responsibilities and Resources

Who will be responsible for data management?

What resources will you require to deliver your plan?

GIS
